OBJECTIVE:

I'm a passionate Full-Stack Developer and MCA student at the University of Mumbai, driven by a love for building clean, efficient, and user-centric digital experiences. My journey began with a curiosity for how things work under the hood — now I craft scalable web apps using the MERN stack, experiment with AI automation, and constantly explore new technologies.
I'm actively seeking **Full-Stack Developer / Software Engineer** roles where I can contribute to impactful projects, collaborate with agile teams, and continue growing as an engineer. When I'm not coding, you'll find me contributing to open source or learning about blockchain and AI.

WORK EXPERIENCE:

Software Trainee, *LA Esfera Multiservices LLP* 12/2025 – 03/2026

- Worked on AutomationEdge (Process Studio) to design and implement workflow automation solutions
- Developed and executed automation scripts using Java Selenium for web-based applications
- Contributed to AI-based products including Voice Transcription and Speech-to-Text systems using OLLAMA models
- Built backend services using Python for handling transcription processing and APIs
- Developed responsive frontend components using React.js
- Managed and queried data using PostgreSQL database
- Collaborated in an agile team environment to design, test, and deploy scalable applications

EDUCATIONAL QUALIFACTION:

MCA, *Thakur Institute of Management Studies, Career Development & Research* 2024 – 2026
Mumbai,India
8.74 CGPA Pursuing

BSc.IT, *Thakur Shyamnarayan Degree College* 2021 – 2024
8.03 CGPI Mumbai,India

12, *Thakur College of Science and Commerce* 2019 – 2021
73.5% Mumbai,India

10, *Lokhandwala Foundation School* 2019
72% Mumbai,India

SKILLS:

Programming Language
Core Java

Frameworks
: React.js, Express.js, Node.js

Frontend Technologies
: HTML,CSS

Database
: MySQL, MongoDB

Version Control
: Git, GitHuB

PERSONAL DETAILS:

English • Hindi

STRENGTH:

- Strong analytical and problem-solving abilities
- Quick learner and team-oriented
- Adaptable to new technologies

ACADEMIC PROJECTS:

QuickPick E-Commerce Website Development
A full-featured e-commerce platform built on the MERN stack. The React.js frontend handles dynamic product listings, cart state, and a responsive UI. The Node.js + Express.js backend exposes RESTful APIs for authentication (JWT), product CRUD, order management, and payment processing. MongoDB stores product, user, and order data. A separate admin panel enables inventory and order management.

EatHub Restaurant and Booking System
An online restaurant and table-booking system deployed on Netlify. The frontend uses HTML, CSS, and JavaScript to render menus, hero sliders, event sections, and a real-time reservation form with date/time/guest selectors. PHP handles backend booking logic and form processing. Supports both customer-facing reservations and operational management for restaurant owners.

CERTIFICATIONS:

Foundational C# with Microsoft (freeCodeCamp) •

Blockchain & it's Application-NPTEL (SWAYAM) — 2025 •

Certificate of Excellence (Java Development Course)- QUASTECH — (May-Oct) 2024 •
